

Dear Mr. Wada,

I am Chanesh kumar from Bodhgaya, Gaya, Bihar (India). My father is a farmer. I am 19 years old. I passed my matriculation from Surya Bharti School, and completed my intermediate from Gaya College, Gaya. Now I am in BSc.1 in Gaya College Gaya and Physics as a main subject. I am learning Japanese because I want to be a Japanese interpreter. I have qualified JLPT N5 & N4 with good marks and now I am trying to take N3, for this I will in JLPT N3 in coming this December. My family is not affordable for my further study. Hence I am getting scholarship from Angel Aid Association. I am learning Japanese from Ms. Yuki Inoue in Bodhaya. I am also getting a lot of support from Ms. Myoko Tomota in learning Japanese on skype. I am also learning English and getting sufficient knowledge of computer only with the help of AAA. I have so many dreams to fulfill these all. As I want build a renowned hospital in India, a dairy farm factory, Apartments, airlines. And after earning a lot of money I want to build a free of cost school for the poor children in my locality. And lastly I want to build a meditation center particularly for those people who are getting suppressed with their oppressed, cursed life. Because nowadays about 11.4% per 100000 people in India are committing suicide because of their annoying life, they are losing hope from their life, so doing meditation they can calm down their hearts and minds and live a happy life with their family.

I have a sweet dream since my childhood to present a big and precious gift to my mother. So I want to construct a big unique house for my family and especially for my mother. Cause my house is not so big to be adjustable for my family. One of the most impressive book that I ever read of Master Ryuho Okawa which impressed me most is, PROSPERITY THINKING. Master defined the success in this book. He said that if we narrow our definition of success as `` getting rich``, then the most important mindset is, ``don't reject wealth`` If you respect the wealth then wealth will be with you and if you ignore it then it will be more away from you. And I think that if someone is prosperous then he can make another prosperous. We should not think that making

money is the equivalent of doing something bad. Because money for making people happy is good.

Hence I decided to become an interpreter and earn a lot of money. For this I want to go to Japan and work Japanese company like Toyota, Panasonic, Honda, Mitsubishi and Sony. I want to fulfill all the expectations from my family, friends and my teachers. I will be trying till my death until I fulfill all expectations. So I am laboring hard:

I will never forget your precious supports and will be ever grateful to you, Ms. Yuki Inoue and our highly regarded Ms. Miyoko Tomota (founder of AAA).

And I hope I will be a successful man one day, because it's my calling from god to serve the needy people.

THANK YOU
